

## NESTLÉ NESPRESSO AVENCHES

### CUSTOMER

Nestlé Nespresso SA

### REALISATION

Phase 1: 2006 - 2008

Phase 2: 2010 - 2011

### ARCHITECT

David Linford,  
Concept Consults  
Architects / Aubert  
Architects

**NESPRESSO**

**A new production site for portioned coffee has been built in Avenches. In a second phase the production capacity has almost been doubled.**

### Description:

The production process start with the reception of the green coffee from the railway. It ends with the of the coffee and other goods expedition by railway or truck.

Some core processes are the green-coffee treatment and blending, the roasting, the milling as well as the filling of the roasted ground coffee in capsules.

In the energy plant all required energies for process and building services are produced, waste heat is recovered and valorised.

### Scope of delivery:

- Basic & Detail Engineering Industrial Services
- Coordination Process – Industrial Services – Building services
- Installation and pipeline construction of Industrial Services (energy plant and energy distribution)
- Detail Engineering for process piping (3D, filling lines)
- Installation and pipeline construction for Process Equipment (filling lines, roasters, waste treatment)
- Process optimisations (inertisation, cooling, CO evacuation)
